IT Support / Helpdesk Profile

Information Technology Engineering graduate based in Japan with experience in IT support, Windows/Linux troubleshooting, system monitoring, database operations, technical documentation, and structured technical work environments. Experienced in both IT and Japanese workplace settings, with strong attention to accuracy, safety, communication, and step-by-step problem solving. Currently focused on IT Support, Helpdesk, Desktop Support, and IT Operations roles.

Core IT Skills

Helpdesk & IT Support: Ticket triage, user support, troubleshooting, escalation awareness, documentation, first-response communication

Operating Systems: Windows, Linux, desktop setup, basic system administration

Networking: TCP/IP, DHCP, VPN concepts, firewall basics, VLAN concepts, routing/switching fundamentals, Wireshark basics

Systems & Monitoring: Zabbix, Nagios, system performance monitoring, technical issue investigation

Databases: MySQL, PostgreSQL, SQLite, data handling, basic database maintenance

Tools & Cloud: Git, GitHub, Streamlit, Docker basics, AWS basics, Google Cloud basics

Programming & Automation: Python, PowerShell basics, Bash basics, JavaScript, SQL

Languages: Arabic Native, English Fluent, Japanese Daily Conversation

Featured IT Support Projects

AI Helpdesk Support Assistant

[Live Demo](#) | [GitHub](#)

- Built a bilingual English/Japanese Streamlit app that simulates Tier-1 helpdesk ticket intake and IT knowledge base support.
- Developed AI-assisted triage that classifies user issues by category, priority, sentiment, resolver team, and first troubleshooting steps.
- Created a local IT knowledge base search workflow for VPN, printer, email login, account lockout, slow Windows PC, and network troubleshooting cases.

Technologies: Python, Streamlit, Gemini API, Markdown knowledge base, python-dotenv, Git/GitHub

IT Operations Center

[Live Demo](#) | [GitHub](#)

- Built a bilingual internal IT operations portal that simulates practical helpdesk and desktop support workflows for a small company IT team.
- Implemented user account support workflows including account lookup, unlock simulation, password reset simulation, MFA reset, enable/disable account, and group membership changes.
- Built asset management, incident tracking, technician notes, warranty tracking, device history, and audit logging for traceable support actions.

Technologies: Python, Streamlit, SQLite, Pandas, Gemini API, python-dotenv, Git/GitHub

Ayman Abdullatif - IT Support / Helpdesk Resume

Professional Experience

Kotobuki Co., Ltd. - Electrical Technician | Japan | May 2026 - Present

- Support technical installation and maintenance work in industrial and construction environments while following structured procedures and safety requirements.
- Assist with electrical wiring, cable routing, equipment setup, and on-site troubleshooting as part of a 4-person technical team.
- Communicate daily with Japanese coworkers and supervisors to confirm tasks, report progress, and resolve worksite issues.
- Developed strong habits in accuracy, documentation, safety compliance, and step-by-step technical problem solving.

Tamaki Co., Ltd. - Insulation Technician | Ichihara, Japan | Feb 2025 - May 2026

- Worked in Japanese industrial environments supporting maintenance and installation work for equipment, pipes, tanks, and boilers.
- Participated in daily workplace coordination and progress communication with Japanese teams.
- Followed strict work procedures, safety rules, and quality standards in fast-paced technical environments.
- Built practical experience around industrial equipment while practicing reliability, clear reporting, and operational discipline.

Krispy Kreme Japan - Production Support Staff | Japan | Mar 2024 - Jan 2025

- Supported production operations by monitoring process flow, equipment condition, cleanliness, and quality standards.
- Assisted with basic operational troubleshooting when production issues occurred.
- Helped maintain inventory-related accuracy and followed internal procedures for smooth daily operations.
- Worked in a multicultural and Japanese workplace environment requiring teamwork, consistency, and attention to detail.

Bohlac Construction - IT Support Specialist | Syria | Apr 2022 - Apr 2024

- Provided on-site technical support for Windows and Linux environments, including hardware, software, and network-related troubleshooting.
- Supported users with workstation, system access, software, and connectivity issues in a business environment.
- Monitored system performance and supported stable operation of internal systems.
- Assisted with MySQL database maintenance, backup-related tasks, and basic performance checks.
- Helped configure and support network/security tasks including firewall, VPN, and VLAN-related environments.
- Documented technical problems clearly and followed up on support issues to improve system reliability.

Education

Bachelor of Science in Information Technology Engineering - Software Engineering

WADI International University, Syria | 2024

Certifications

- Certified Electrical Handling Worker Safety Training - Japan
- Oxygen Deficiency & Hydrogen Sulfide Hazard Worker Safety Training - Japan
- Full-Harness Fall Protection Safety Training - Japan
- Asbestos Special Education - Japan

Additional Projects

Additional software projects are available on my [GitHub](#). For this IT Support resume, the main highlighted projects are the AI Helpdesk Support Assistant and IT Operations Center because they directly demonstrate helpdesk workflows, troubleshooting, documentation, ticketing, user account support, asset management, and IT operations.
